Dear Sir:

In response to the Office Action dated May 13, 2003, applicants present the following remarks. Applicants respectfully request reconsideration of the restriction requirement as set forth in the Office Action as examination of all 15 pending claims would not pose undue burden on the Examiner. In any event, applicants provisionally elect the Group I claims, namely, claims 1-11, drawn to a security gate assembly.

The Office Action restricted pending claims 1-15 in the above application into three groups as follows: (1) Group I (claims 1-11) which, according to the Action, are drawn to a security gate assembly; (2) Group II (claims 12-13), which according to the Action, are drawn to a control system; and (3) Group III (claims 14-15), which according to the Action are drawn to a linkage assembly. The Office Action then concluded that the inventions to a security gate assembly for controlling vehicle traffic, a control system implementing method data associated with input and output functions, and the linkage assembly attached to a driven member via motor, are distinct inventions and have acquired separate status in the art.

Applicants respectfully traverse the restriction requirement. While the subject matter of the claims is commensurate with the various elements as set forth in the claims, applicants submit that a search and examination of the entire set of claims in the application can be made without serious or undue burden to the Examiner. That is because in some form the

inventions as set forth in the claims have application to the security gate art. Accordingly, applicants respectfully request that all of the claims be examined on the merits, even though the application includes claims of various scope and directed to various features and embodiments.

Applicants provisionally elect Group I (claims 1-11) for prosecution in the instant application without prejudice for filing one or more divisional applications to the subject matter of the non-elected claims.

Respectfully submitted,
